

mavili

Our Headquarter
and manufacturing
facility are located
in Turkey,

Russia and CIS
Countries Regional
Office is in Moscow.

maxlogic & mavigard
fire and gas detection systems

maxlogic & mavigard
fire and gas detection systems

Thanks to our 7 different regional offices, we support our customers both before and after-sales.

Our manufacturing facilities are located in **Dudullu** - Istanbul and **Gebze** - Kocaeli

maxlogic & mavigard
fire and gas detection systems

Our manufacturing facilities are located in **Dudullu - Istanbul** and **Gebze - Kocaeli**

maxlogic & mavigard
fire and gas detection systems

~5.000m²

DUDULLU

Our manufacturing facilities are located in **Dudullu - Istanbul** and **Gebze - Kocaeli**

maxlogic & mavigard
fire and gas detection systems

~20.000m²

GEBZE

We are a team of approximately 250 people consisting of engineers, technicians and manufacturing employees who are experts in their fields.

maxlogic & mavigard
fire and gas detection systems

- R&D
- Manufacturing
- Quality Control
- Pre-sales Services
- After Sales Services

MAVILI

Our products, electronic circuit design, mechanical design and software development are made by our R&D department.

maxlogic & mavigard
fire and gas detection systems

R&D

The design validity tests of the product prototypes developed by the R&D team are carried out by our **Laboratory** unit.

maxlogic & mavigard
fire and gas detection systems

LABORATORY

Manufacturing processes are implemented by high-tech SMT machine park

SMT machines have a capacity of 76.000 components placement per hour.

maxlogic & mavigard
fire and gas detection systems

SMT
Machine Park

MANUFACTURING

Each product is tested at every stage of manufacturing process.

maxlogic & mavigard
fire and gas detection systems

Gebze
Manufacturing
Plant

MANUFACTURING

All tests are performed according to EN 54 standards by our quality control department.

maxlogic & mavigard
fire and gas detection systems

Sensitivity tests of smoke detectors are performed by our quality control team in wind tunnel which is designed according to EN 54-7 standard.

Gebze
Manufacturing Plant

Dudullu
Manufacturing Plant

QUALITY
CONTROL

Project design of fire detection systems according to EN 54-14.

maxlogic & mavigard
fire and gas detection systems

Projects in accordance with architectural plans can be created by using key symbols, user manuals, connection diagrams, device codes, technical specifications and exact measurements of the device in Revit Family files.

PRE-SALES
SERVICE

- Commissioning
- Periodical Maintenance

maxlogic & mavigard
fire and gas detection systems

AFTER
SALES
SERVICES

Our expert trainer staff organizes **sectoral trainings and free webinars** within the scope of standards and regulations.

maxlogic & mavigard
fire and gas detection systems

www.maviliakademi.com

MAVILI
ACADEMY

VCR.TR.01.015196

maxlogic & mavigard
fire and gas detection systems

Our fire and gas detection systems
are compatible with **EN 54 Standards**.

- Certificated by **CPD & CPR institute**
- Certified by international certification boards such as **LPCB, Dedal, GHOST** etc.

CERTIFICATES
LICENCES

INTELLIGENT ADDRESSABLE FIRE AND GAS DETECTION SYSTEMS

maxlogic & mavigard
fire and gas detection systems

127 address capacity
for each loop

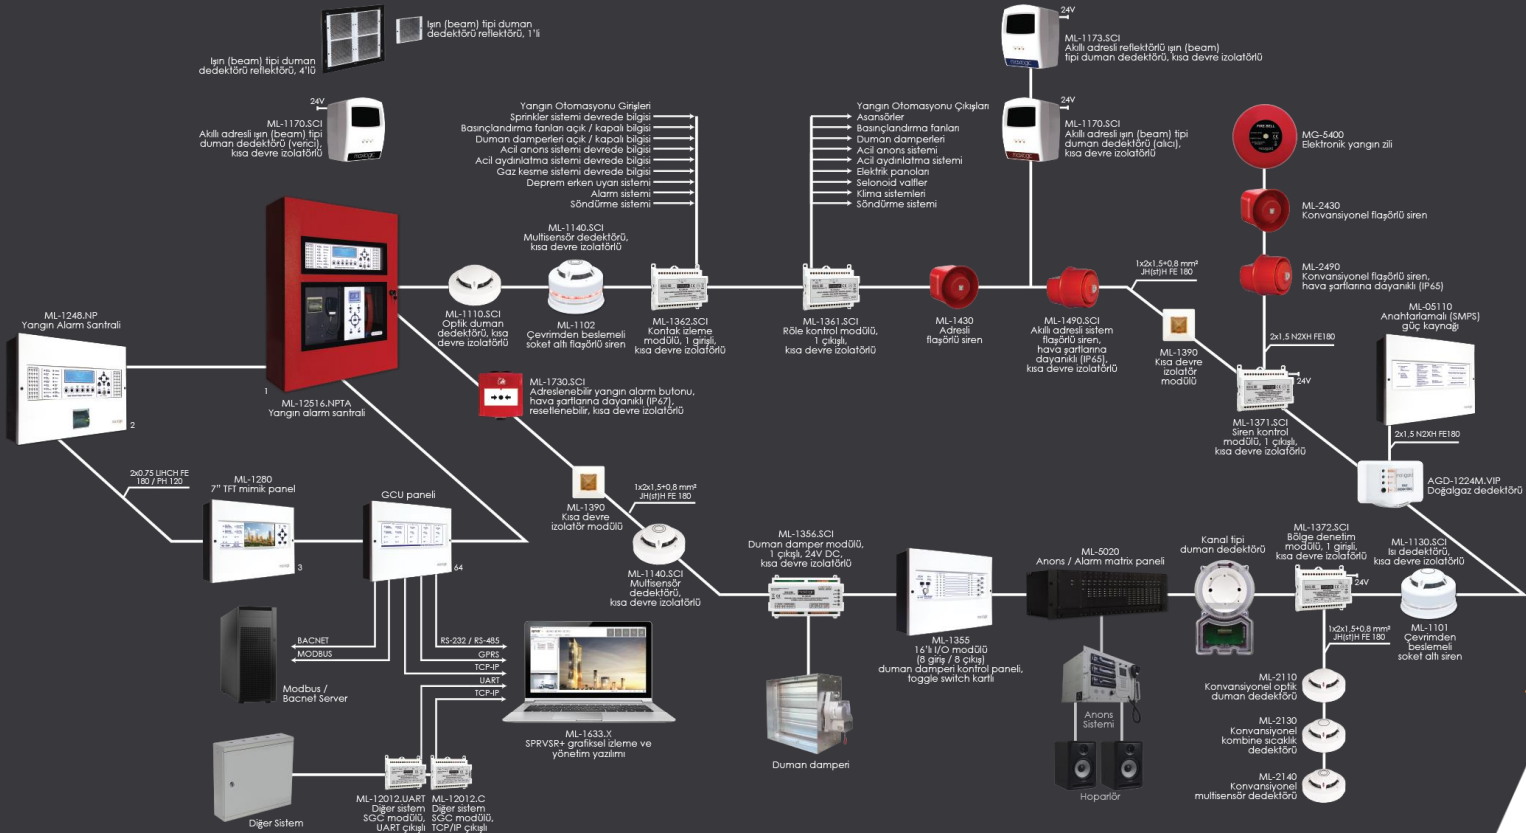

Telephone, printer and
announcement module options in
fire alarm control panels

Exact point detection in the system
as Fire Alarm or Fault Alarm,
1000 fire scenarios capacity per panel

Up to 1000 events can be recorded

Network structure up to 64 panel

Expandable up to 16 loops

SMOKE DAMPER MODULES

maxlogic & mavigard
fire and gas detection systems

Controlling damper motors with one address and monitoring position switches

220V AC, 24V DC and 24V AC operating voltage options to suitable for all smoke dampers

Damper output line, remote control input, position monitoring input, detection of open / short circuit faults

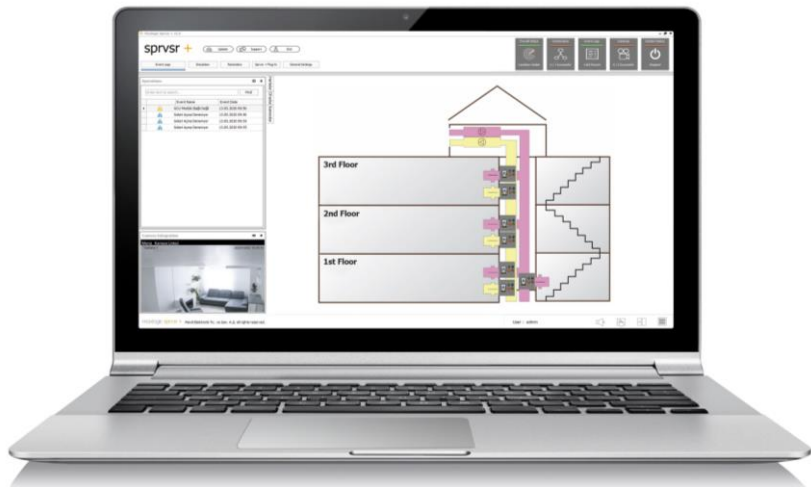

Display of the smoke damper module, Open, Closed and Damper Fault positions.

Open, Closed and Damper Fault (stay in between) locations of the dampers can be seen from the panel event logs and the screen of the panel

Smoke Damper Control with SPRVSR+ Software

- **Open / Closed** commands can be send to Smoke Dampers
- Smoke Dampers can be monitored for **“Fault”** conditions

- If required for security reasons, **1st Level** and **2nd Level Delay** assignments can be made to enable **Smoke Dampers** to be opened and closed in a delayed mode.

BEAM TYPE SMOKE DETECTORS

maxlogic & mavigard
fire and gas detection systems

Three sensitivity levels
can be **easily adjusted**

Intelligent addressable and
conventional models

Receiver-Transmitter or
reflective models

They should be installed as facing each
other between the distance of **5-100m**.

Unit and reflector should
be mounted as facing each other,
distance is **5-35 meters** with **1 reflector** and
5-50 meters with using **4 reflectors**.

ANNOUNCE / ALARM MATRIX PANEL

maxlogic & mavigard
fire and gas detection systems

Announce / Alarm matrix panel provides the integration with announcement system.

Up to 32 units of
announce module
connection inputs

Modular structure
expandable up to
16 modules

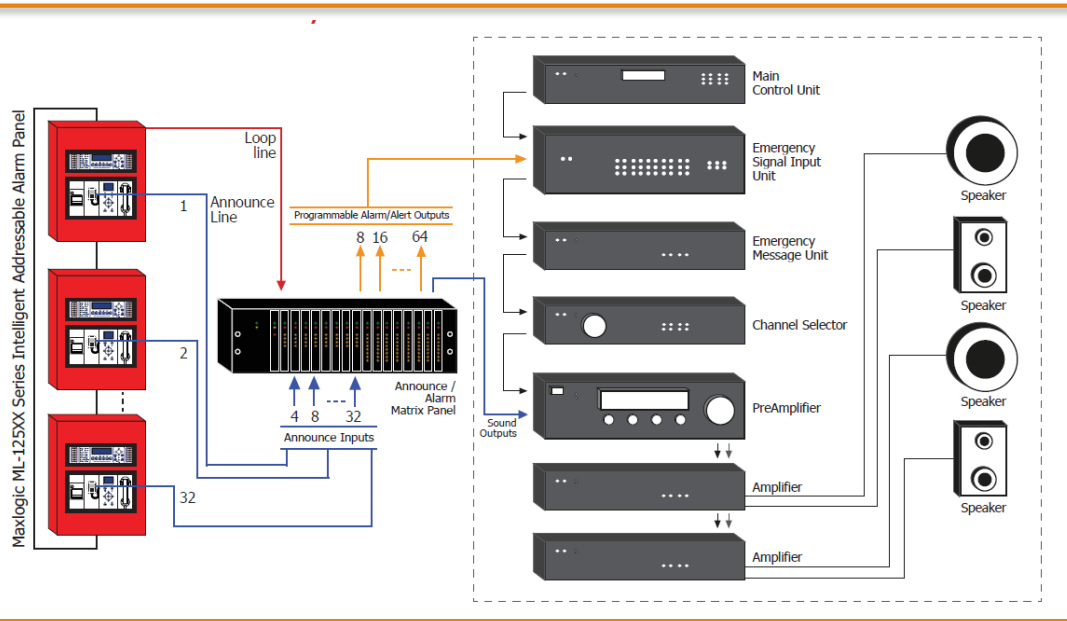

Ability perform
announcement in 8 zone
with the help of 60
announce microphone

Compatible with 19",
3U rack

ANNOUNCE / ALARM MATRIX PANEL

When fire and / or emergency situation occurs;

- Using Alarm / Alert output modules, it provides an automatic announce with pre-recorded messages or sound records via present announce system to the determined areas.

FIREFIGHTER'S TELEPHONE CONTROL UNIT

maxlogic & mavigard
fire and gas detection systems

In case of an emergency, allows the communication of authorized people with the security center or other of firefighter's telephone units.

CONVENTIONAL FIRE ALARM CONTROL PANELS

maxlogic & mavigard
fire and gas detection systems

Compatible with
EN 54-2 and EN 54-4

2, 4, 8 and 16 zones

Up to 32 repeater panels and/or fire
panels assembled into a network
with using repeater panel

Up to 1000 events log memory

CONVENTIONAL FIRE EXTINGUISHING CONTROL PANEL

maxlogic & mavigard
fire and gas detection systems

- Cross-zone operation can be selected to be active/passive via PC software
- 4 detection zones, 1 extinguishing zone
- Extinguishing mode can be changed remotely with extinguishing status key input

GAS DETECTION SYSTEMS FOR CLOSED PARKING AREAS

maxlogic & mavigard
fire and gas detection systems

Effective solution for carbon
monoxide gas detection
in parking areas

2 level threshold,
50 ppm and 200 ppm

Control of jet fans with dual-level
relays for carbon monoxide
evacuation

MARINE TYPE FIRE ALARM CONTROL SYSTEM

maxlogic & mavigard
fire and gas detection systems

All marine products have, **TURK LLOYD** (SOLAS 74 and FSS),
WHEELMARK and **IACS** (International Association of Classification
Societies Ltd.) member “**Russian Maritime Register of Shipping**”
type approval certificate.

SPRVS+ GRAPHICAL CONTROL AND MONITORING SOFTWARE

Communication types with RS-232/485 cable, GPRS and TCP / IP modules

64.000 fire and gas detection system management capacity

The location of fire and fault alarms can be determined easily

IP CCTV system integration with ONVIF protocol

Android / IOS Mobile Device Version

SPRVSR+ GRAPHICAL CONTROL AND MONITORING SOFTWARE

maxlogic & mavigard
fire and gas detection systems

Android / IOS mobile device versions are available.

FIRE DETECTION SYSTEM INTEGRATION IN INTELLIGENT BUILDING TECHNOLOGIES

maxlogic & mavigard
fire and gas detection systems

- BMS Modbus and BACnet integration
- IP security system integration with ONVIF protocol
